Our solution simplifies the experience to ensure your accountholders understand it, grow with it and see you as their primary financial advisor for life. Our tools can help you inform your users of the next product they need before they know they need it.

HOW IT WORKS

We simplified the user experience, offer cohesive customized branding and provide easy-to-follow instructions for both you and your accountholders.

Keep in close contact with your digital banking consumers through a secure support portal. Simply send messages regarding updates or quickly answer questions as they arise.

Our administrative tool provides reports and dashboards for quick access to key account activity and insights on how your customers are engaging the solution. You can also localize the admin tool based on the types of households and accounts each branch services ensuring your locations receive the customized experience they expect.

director of sales to learn more.

PERSONAL AND BUSINESS BANKING FEATURES

Users can readily view accounts and monthly statements, verify recent transactions, deposit checks, pay bills, transfer funds between their accounts and to accounts at other financial institutions and more in real time.

Your customers can setup alerts to help monitor account balance and transactions via email or text. Additionally, custom alerts notify your customer when an account balance gets too low, a direct deposit is received, or a payment is due.

Our mobile application helps protect your customers' accounts with biometric authentication. Small business customers can view personal and business accounts with a single sign on, securely upload a payroll file, manage authorized users, include invoice information with bill payments, and more.
